

# MOULDINGS

Coating profiles is a process through which a surface is laminated on a rectilinear material (support). The lamination is done with a profile coating machine. Whether it is a head or ogee moulding or any other surface, the coating will be done according to the best trade practices, with precision.

# TECHNICAL SPECIFICATIONS

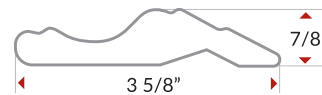

**CL-10**  
Light moulding  
5/8" x 2-3/4"

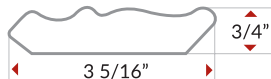

**MT-10**  
Railhead  
1-1/4" x 4"

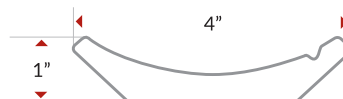

**MT-20**  
Railhead  
15/16" x 3"

**OG-10**  
OGEE  
3/4" x 3-3/4"

**OG-20**  
OGEE  
1" x 4"
